Stunning Replicas in Kit Form

Open the box to find all you need.
Precision parts, expertly made; they slot together easily making up an exact, photorealistic replica of your product on a giant scale.

360° from just one photo

Using our proprietary software and patented rendering techniques we are able to take a flat photo and create a full wraparound without any stretching or distortion.

Slots together like a “kids toy”

Our software scans the original product, generating a digital 3D blueprint. A precise framework is then laser cut from MDF and all parts are numbered making for easy assembly in minutes.

VERSUS

Solid Forms

Less cost than fibreglass and with far greater detail achievable. Delivered flat packed for better mobility and lower shipping costs. Removable, washable covers help to keep your product looking its very best.

Endless Applications

Supermarkets, Cash & Carrys, Bars and Restaurants all use StackaWraps. Product Launches, Events and Tasting Sessions can all benefit from these giant 3D super models.

Free Standing or Floating

Stand them on the floor – They'll produce that Interruption your product really deserves. Or float them in the air with one of our specially designed magnet attachments.

Typical contents of a kit

- ▶ Photo printed dye sub (FR) cover with zipper
- ▶ MDF laser cut internal "snap together" frame
